Solar, AC/DC

SiteGrid X3

LIGHTWEIGHT 3kWh PORTABLE POWER UNIT

The SiteGrid X3 is a truly portable lightweight power system that can deliver up to 3.6kW at peak power.

The unit is a compact and efficient product for delivering power to low energy consumption assets as well as charging tools and supporting remote working devices such as radio's and comms equipment.

The lithium battery system within the unit is rated to >3000 cycles and includes a management portal for monitoring charge and discharge rates as well as levels.

The safety system includes 6 layers of protection including over charge/ discharge, overload, over temperature, short circuit and under voltage.

Features & Benefits

- Lightweight, only 25kg
- Portable, carry case with wheels
- Can be charged from grid, solar or DC input
- Multiple protection devices
- No noise
- No emissions
- Zero carbon
- BMS and management portal
- LED Display
- Recharge time only 6 hours
